

Day 12

ebay.com.

electronics → (more home)

Action class

move to element

↳ smart phone of accessories

## Move to element

Labeling issue.

So wait that & make it load

### ( Selenium wait )

↳ WebElement wait

① Implicit wait

② Explicit wait

↳ global wait

} Dynamic wait

driver.manage().timeouts().implicitlyWait (Duration of seconds (10));

↳ After this command this wait code will apply.

↳ before 10 seconds it will load.

### ② Explicit wait:

used to tell ~~webdriver~~ webdriver to wait for certain condition.

WebDriverWait = new WebDriverWait (driver, Duration of sec)

wait.until (Expected Conditions, visibility of element

Located (By.xpath (" " ), click);

## Drag & Drop

Drag & drop by the test.

Action class.
