2) emailable-report (high level Report)

TestNG Execution
_____
by default TestNG will create an xml file d it
is Executing

Disadvantages
_____
Bad UI Report
=> old fashioned

Alternative Report methodology
_____
1) Extent
2) Allure

Extent Reports
_____
→ Editable Report
→ download Extent super Jar file d Add to
un selenium)

Report → File → Future Reference

→ 3 Main classes

<u>→ 3 Main classes</u>

(IMS'S) (common)

① Extends Spark Reports → Extral Report → look & feel, Report generated

② Extend Test → updation

③ Extends Reports → give entries (new)

Assertion / Lib difference
_____

Assert. assertEquals (actual, expected);
sysout (titles);

(Hand Assertion) → Exit After tcs fails

① Test
② After method → (Report)

(Test result) → intoyfaw, previous Execute method status
→ getName/ get Throwable.
Add to Report according to this
→ getName();

(Fail / Pas / skip)

(static) → without obj/ we can call
