① single webelement ——→ Take screenshot (interface)

② whole Page screenshot ↗ get screenshot as ;; method

selenium ④ ——→ single webelement screenshot

SYNTAX / ① whole Page.

File screenshot = ((Takescreenshot) driver).get screenshot (output type
file);

view.

Ⓐ copy / save in folder.

filehandler.copy (screenshot, new file ("D. Name .png"))

↑
(Static method)

① **Single webelement**

webelem Pay = driver.get find element

In same Project :

Project —→ New folder

filehandler.copy (src l, new file (". Screenshot // src.

whole Page   **webelement**
① interface   ① method save to file
② method save to file   ② file save to path
③ file save to local disk

Alert :

Target Locators (interface) → alert() → method

↘ alert → interface

Inspect alert box / Handle Alert :

driver.switchto().alert().accept(); / dismiss

test verification then handle

Alert (a) = driver.switchtoes.alert();

↘ reference

String name = a.gettext();

if (Expect equal(name))

{

}.

a.accept();

→ valu Pans

→ submit form

Assign :
